PROFILE

SharePoint Developer with extensive expertise in PowerApps, Power Automate, and SharePoint Online. Proficient in full-stack web development, I excel in creating and optimizing applications that enhance business processes and collaboration. Committed to delivering high-quality, user-centric solutions to improve operational efficiency.

WORK EXPERIENCE

Pacer Solutions

Oct 2022 - Present

M365 | SharePoint Developer Lead

- Developed complex SharePoint SPFx solutions and extended SharePoint capabilities by creating custom buttons in the library ribbon, significantly enhancing user functionality and operational efficiency.
- Pioneered the integration of PowerApps, Power Automate, and Outlook add-ins, delivering tailored solutions that streamlined client operations and consistently exceeded user expectations by simplifying complex processes.

Clink IT

Apr 2022 - Oct 2022

Senior SharePoint Developer

- Led SharePoint Online enhancements, focusing on the integration of advanced JavaScript and HTML web parts, and replicated user interfaces from legacy systems to SharePoint Online, which streamlined user experience and system performance.
- Spearheaded user-centric development initiatives, aligning SharePoint solutions tightly with specific business functions, thereby boosting overall productivity and user satisfaction.

Accenture

Oct 2021 - Apr 2022

Application Development Senior Analyst

- Drove significant advancements in Salesforce using Lightning Web Components, managing both development and administrative functions to enhance platform robustness and user interaction.
- Directed the transformation of legacy systems to modern PowerApps solutions, emphasizing security enhancements and operational efficiency, which resulted in elevated system reliability and user trust.

Viseo

Mar 2021 - Oct 2021

SharePoint Developer

- Led the technical migration of a publishing site from Bootstrap 3 to Bootstrap 4, and heightened security measures for a web-based search bar to prevent XSS attacks, marking significant strides in web security and user safety.
- Collaborated with diverse business units and external partners to deliver custom SharePoint solutions that met unique business needs, establishing a foundation for continued digital transformation and efficiency.

House of IT

Aug 2018 - Mar 2021

SharePoint Developer

- Developed dynamic SharePoint functionalities including real-time chat applications and tailored web parts, fostering enhanced communication and user interaction.
- Delivered specialized training sessions for the Total Quality Management (TQM) team, focusing on empowering them with the skills needed for independent web updates and modifications, while actively engaging in Agile project reviews to steer continuous improvements.
