PROFILE

Microsoft 365 and SharePoint Developer with 9 years of experience delivering business solutions using Power Apps, Power Automate, SharePoint Online, SPFx, and Dataverse. Experienced in workflow automation, system integration, production deployment, and application support. Also skilled in SharePoint 2013/2016, Salesforce, and full-stack web development. Focused on building reliable and user-friendly solutions that improve business processes and daily operations.

WORK EXPERIENCE

Pacer Solutions

Oct 2025 - Present

M365 Developer Lead

- Developed SharePoint Online and SPFx solutions, including custom web parts, library buttons, and client-specific functionality.
- Built Vehicle and Task Management applications using Power Apps and Microsoft 365 technologies.
- Created custom Outlook add-ins to extend email functionality and support business processes.
- Integrated SharePoint and Power Apps with Xero using custom connectors and live Xero API connections.

Accenture

Feb 2025 - Oct 2025

Application Development Senior Analyst

- Developed and modified Salesforce Lightning Web Components (LWC), including forms, UI components, validations, and Salesforce data integration.
- Configured Salesforce objects, fields, permissions, and application components, and troubleshooted issues during development and testing.
- Developed a Power Apps Incident Management System, including forms, business logic, data handling, and user access.
- Built multi-level approval workflows in Power Automate and Power BI reports to track incidents, approval status, and operational data.

Gallium31 Corporation

Aug 2021 - Jan 2025

IT Sharepoint Developer

- Developed a RFID Management App in Power Apps with forms, business rules, validation, record tracking, and SharePoint integration.
- Built a Business Insurance System using Power Apps, Power Automate, and Power BI for approvals, notifications, and reporting.
- Supported the PHP-based Yarda application by investigating user issues, fixing defects, and assisting client users including form updates, new fields, validation changes, and PHP functionality modifications.
- Developed Power BI reports and dashboards using application data to track requests, statuses, and business performance.

Viseo

Mar 2021 - Aug 2021

SharePoint Developer

- Modernized an existing SharePoint publishing site by upgrading the UI from Bootstrap 3 to Bootstrap 4 and updating outdated page styles and components.
- Maintained the CHI SharePoint publishing site and fixed cross-site scripting (XSS) vulnerabilities to improve application security.
- Enhanced existing SharePoint solutions based on client business requirements, including page updates, custom functionality, and process changes.
- Developed and maintained SharePoint-based approval processes and business workflows to support client operations.

House of IT

Aug 2018 - Mar 2021

SharePoint Developer

- Built and maintained SharePoint sites, custom web parts, and a real-time chat application to support internal business processes and improve user collaboration.
- Worked closely with users and business teams to gather requirements, resolve technical issues, enhance existing solutions.
- Trained and supported the Total Quality Management (TQM) team in maintaining SharePoint content and managing day-to-day site changes independently.
- Recreated legacy system interfaces in SharePoint 2013 to improve usability and performance.
